## SUMMARY

Full stack web developer transitioning from Automation Programming. I love being able to create a line of code and then see it transition into a live function, and enjoy creating products that have a well thought out backend with a solid, natural front end.

## SKILLS

| | |
|---|---|
| **Web Development** | HTML, CSS, SCSS, JavaScript, React, Node, Ruby on Rails, jQuery, AJAX, JSON, Express, EJS, Axiom, SQL, Remote setup Virtual Machine and Vagrant, Collaboration using Slack, Discord, GitHub and VS LiveShare, Troubleshooting code , software and hardware |
| **Home Automation Programming** | Custom Home Automation and Voice Control: Control4, RTI, Savant, Lutron, Somfy, Systems integrations: AV, Climate, Security, Access , Intercom, Monitoring, Large scale LAN implementations, Remote troubleshooting, support and service solutions, Training and Support for junior programmers, Providing simplified explanations of complex systems |
| **Audio Control Software** | Production Software: Avid/Protools, Ableton Live, Reason, Cubase, Capturing, editing and mastering audio for film and TV, Live audio events setup and teardown, Troubleshooting and solutions |
